<b>Market commentary</b>	<p>The Australian equity market had a good month, with the S&amp;P/ASX 200 Index (Total Returns) rising 1.09%. Local economic data was mixed, with solid employment growth and building approvals contrasting persistently weak wages growth, softer retail sales and a fall in house prices. The Federal Budget was released during the month and was generally well received. Highlights included personal income tax cuts, increased infrastructure spending and an earlier than expected forecast return to surplus. The Australian government 10-year bond yield fell by 10 basis points over the month and the Australian Dollar rose slightly against the US Dollar. Commodities prices were also relatively stable. Looking at performance by sector, Health Care (+5.6%) was strongest, largely due to CSL (+9.1%). Consumer Discretionary (+5.1%), A-REITs (+3.1%), Materials (+2.0%) and Information Technology (+1.4%) also performed well. Telecommunication Services was the standout underperformer (-10.2%), largely due to Telstra Corporation (-11.9%). Consumer Staples (-0.4%) and Financials (-0.2%) also underperformed.</p>
--------------------------	--

<b>Fund commentary</b>	<p>The Fund returned -0.56% (after fees) for the month, underperforming the benchmark by 1.65%.</p> <p>Over the month, we observed increasing divergence in valuations across the market and this was the key driver of our underperformance (it is worth highlighting that this was our weakest month of performance since the lows of mid-2016, which was followed by an extremely strong value recovery). Many of the high-priced growth names, including CSL (+9.1%) and Aristocrat (+12.7%), continued to outperform whilst many of the value-oriented names, such as Telstra Corporation (-11.9%) and QBE Insurance Group (-4.8%), came under further pressure. Needless to say, we are heavily underweight the former category and overweight the latter. It is also noteworthy that nearly half of our underperformance came from stocks not held by the portfolio. Admittedly, revised earnings expectations played a role in stock performance, but divergence in valuation multiples was a consistent theme. With this divergence near all-time highs, we remain confident that our performance will benefit strongly from reversion in this unsustainable situation.</p> <p>Our resource holdings were a significant positive contributor to performance, led by overweight positions in BHP Billiton (+5.9%) and Rio Tinto (+3.9%). BHP and Rio joined other global mining companies in presenting at the annual Miami conference. The main themes from the conference were continued capital discipline, but BHP also gave further details on their ability to unlock latent capacity expansion at existing assets. Our exposure to the banking sector also proved supportive. In addition to being modestly underweight to the underperforming major banks, we were significantly underweight to Commonwealth Bank of Australia (-3.5%), which was particularly weak. Our overweight holding in Wesfarmers (+4.1%) also contributed positively, assisted by improving conditions in the Australian supermarket industry and the announced closure of its failed Bunnings UK venture, with lower than expected exit costs.</p>
