¹ The Fund's performance is based on the movement in net asset value per unit plus distributions and is before tax and after all fees and charges. Imputation and foreign income tax offsets are not included in the performance figures.
Inception date: 14 July 2015

² Benchmark: OECD Total Inflation Index + 5.5% p.a.
² The Reference Index is the FTSE Global Core Infrastructure 50/50 Hedged to AUD Net of Tax Index

Market commentary Global listed infrastructure was up for July in AUD hedged terms with the reference index² up 1.4% for the month. Global equities performed approximately inline with listed infrastructure and finishing up 1.5% in AUD hedged terms.

Developed market long bond yields were mostly flat for the month, with the US 10 year bond yield starting the month at 2.30% and finishing at 2.29%.

Global listed infrastructure is up 12.4% calendar year to date as measured by the reference index.

Fund commentary The Fund returned 0.6% in AUD terms for July, underperforming the listed infrastructure reference index for the month. The Fund is up 8.5% calendar year to date.

The Fund finished the month with 28 infrastructure stocks and our expected range over time is 25-35 holdings. Approximately 71% of Fund holdings delivered a positive return for July in local currency terms.

Our European concession holdings (airports and tollroads) continued their strength in July as firm traffic growth continued. Our Australian infrastructure holdings such as Spark Infrastructure and Transurban were weaker, as were some of our North American pipeline holdings. Kinder Morgan, a primarily US natural gas pipeline operator, was an exception as it performed well after delivering a solid earnings result for the June quarter whilst management also announced their intention to significantly raise shareholder returns via increased dividends and share buy-backs through 2020.
